AGENCIES IN ALL THE PRINCIPAL TOWNS IN QUEENSLAND.

This Company was incorporated by Special Act of Parliament in 1888 solely for the purpose of acting in the capacities and of performing the duties undermentioned. **AS IT TAKES NO OTHER BUSINESS WHATSOEVER**, it is not only free from any element of speculation, but provides for the public a permanent and guaranteed system of skilled management under the direct supervision of the Supreme Court. Under the Company's Special Act, it may be appointed to undertake any of the following duties:—Executor, Administrator, or Trustee under Wills, Marriage, or other Settlements; Attorney or Agent in the management or realisation of Estates; Guardian of the Person and the Estate of any Infant, Liquidator or Official Liquidator of any Company; Trustee in Insolvency; or Committee in Lunacy.

In compliance with the Company's Act, the sum of **£20,000** is invested in the name of the State Treasurer as security for the faithful performance of duties entrusted to the Company. **THE CHARGES** are less than the Court usually allows to private executors. Pamphlets obtainable on application.

P. A. BLUNDELL, Manager.

DIRECTIONS FOR MAKING A WILL.

A WILL should be made in the plainest language possible; it must be written with ink on paper or parchment, and must be signed at the foot or end thereof by the testator (the person who makes the will) or some other person, in his presence, and by his direction, and the testator must make or acknowledge such signature in the presence of two or more witnesses, who must be present at the same time and attest and subscribe the will in the testator's presence. A full attestation clause is given in the forms below, and its use in all cases will probably save a lot of trouble.

The witnesses should not be in any way beneficially interested in the will, as any beneficial gift, legacy or appointment by the will to an attesting witness, or to the husband or wife of an attesting witness (except a charge for payment of debts) is void. An executor or trustee appointed by a will may, however, act as an attesting witness.

A witness need not know the contents of the will, as the will may be so folded that the signature and Attestation Clause alone may be seen.

On the question of whom to appoint executors or trustees, attention is directed to the advantages of appointing a permanent institution like **Queensland Trustees Limited**, whose advertisement appears on the opposite page.

FORMS OF WILLS.

I.—WILL GIVING TO ONE ABSOLUTELY ALL THE TESTATOR'S REAL AND PERSONAL ESTATE.

I, A.B., of &c. (testator's name, residence, and quality), hereby REVOKE all testamentary writings heretofore executed by me, and declare this to be my last will made and executed on the _____ day of _____ 19__.

I DEVISE and BEQUEATH all my real and personal estate unto (devisee's name, residence, and quality) absolutely. AND I APPOINT the said (name) sole executor of this my will. IN WITNESS WHEREOF I have hereunto set my hand.

(Testator's signature).

Signed by A.B., of &c., as his last will, in the presence of my present at the same time, who, at at his request, in his presence, and in the presence of each other, have subscribed our names as attesting witnesses.

(Names and addresses of two witnesses).

II.—WILL OF A MARRIED MAN GIVING THE INCOME OF HIS PROPERTY TO HIS WIFE; SUBJECT THERETO, THE CAPITAL EQUALLY AMONG HIS CHILDREN, THE CHILDREN OF A DECEASED CHILD TAKING THEIR PARENT'S SHARE.

THIS IS THE LAST WILL of me (testator's name, residence, and quality). I REVOKE all testamentary instruments heretofore executed by me, and I APPOINT _____ and _____ for **Queensland Trustees Limited**, hereinafter called "my trustees," executors and trustees of this my will. I BEQUEATH to my wife (name) all the household furniture, plate, linen, china, glass, books, pictures, prints, provisions, and other household effects belonging to me at the time of my death, and a legacy of £....., to be paid to her out of the first moneys coming to the hands of my executors. And as to all the rest of my estate and effects, both real and personal, I devise and bequeath the same unto and to the use of my trustees UPON TRUST to sell,

call in and convert into money my real and residuary personal estate. And UPON FURTHER TRUST to invest the money arising from the sale calling in and conversion thereof in the names or name of the trustees or trustee for the time being of this my will; And to pay the annual income of such investments to my wife during her life. And from and after her death as to the capital and income of the same investments UPON TRUST for my children in equal shares, the respective shares of such children to be absolutely vested on my death. Provided that if any child of mine shall die in my lifetime, leaving issue, who shall survive me, and who being male shall attain the age of twenty-one years, or being female shall attain that age, or marry under that age, such issue shall take, and if more than one, equally between them, the share which their, his, or her parent would have taken of and in any residuary estate if such parent had lived to attain a vested interest. I DECLARE that the trustees or trustee for the time being of this my will shall have a discretionary power to postpone for such period as to them or him shall seem expedient the sale calling in or conversion of any parts of my real or personal estate, but the unsold real estate and the outstanding personal estate shall be subject to the trusts hereinbefore contained concerning the investments aforesaid, and the rents and yearly produce thereof shall be deemed annual income for the purposes of such trusts, and the unsold real estate shall be deemed to be converted as from the time of my death, and be transmissible as personal estate accordingly. I DECLARE that if at any time or times during the widowhood of my wife the annual income of my estate shall be less than £....., it shall be lawful for the trustees or trustee for the time being of this my will to raise out of the capital thereof and pay to my widow such a sum as will make her income up to £..... a year. I DECLARE that so long as my wife lives and continues unmarried the power of appointing new trustees conferred by statute shall be exercisable by her. In witness whereof I have hereunto set my hand this.....day of.....19__.

(Testator's signature).

Signed by the testator, the said (testator's name), as his last will in the presence of my present at the same time, who at his request, in his presence, and in the presence of each other, have hereunto subscribed our names as attesting witnesses.

(Names and addresses of two witnesses)

NOTE.—Obliterations and alterations of any sort in the will ought, if possible, to be avoided; when they have to be made, each one of them must be signed or initialled by the testator and witnessed on the margin, or as near to the alteration as possible.

It is also advisable for both the testator and the witnesses to subscribe their names at the foot of every sheet, where the will contains more than one sheet of paper.

Marriage after making a will renders the will void, and necessitates another being made.

N.B.—If the above forms are not adapted to your requirements, it will be prudent to secure professional assistance, and if this is not at hand, write to the manager of **Queensland Trustees Limited**, vide advertisement on opposite page.

FEBRUARY.**GARDEN, ORCHARD, AND FARM CALENDAR, AND DIARY.**

The blank half of this page is intended for Notes, such as the sowing of seeds, the blooming of plants, planting and other garden operations.

GARDEN—VEGETABLES.—This should be an active month. Dig roughly all unoccupied beds which have been previously trenched, adding well decomposed manure, or fine bone dust, if other manure not available. Transplant cabbages, Brussels sprouts, cauliflower, celery, &c. Sow French beans, Brussels sprouts, carrot, cauliflower, celery, mustard and cress, lettuce, radish, prickly spinach, endive, onion, peas, parsnip and turnip. Mulch the melon and cucumber holes with a dressing of long stable manure; shape the surface between the holes so as to catch and hold water from thunder showers. In very dry weather, when the cucumber plants appear to suffer, give ten to twenty gallons of water in the evening to each hole, so that they may be thoroughly soaked, applying the water so that it may get into the soil where the roots are. French beans, &c., should be gone over daily, and gathered as soon as they are ready. In the North, now is the best time in the year for sowing sweet corn, but it is yet early for the bulk of the vegetables mentioned above.

FLOWERS.—Great activity must prevail now to catch the season for a good floral display with such plants as will not stand the heat. Most English annuals can be grown now and later on, that will not even germinate during the heat of summer. No matter how excellent the seeds of mignonette, sweet pea, larkspur, and many other annuals indigenous to a cool climate may be, they positively refuse to germinate while the soil heat is high, and many people waste time, patience, and means trying to effect the impossible, and blame the seedsman for their own mistake. Rich soil and a well prepared friable seed-bed, and if artificially shaded from sun and heat, so much the better; and then seeds of phlox, pansies, coreopsis, asters, cinerarias, daisies, and many other floral gems and favourites, can be grown successfully, on the Downs especially, in South Queensland fairly, but in North Queensland only partially, and then by starting later on. Continue to bud and layer roses, and layer also any choice shrub which it is desirable to propagate. Keep the garden clean and neat. Withhold water from bulbous plants showing indications of going to rest. Abutilon, clorodendron, cobaea scandens, tecoma jasminoides, and other plants should now be in full bloom.

BUSH-HOUSE OR SHADE GARDEN.—In the event of the weather being seasonable, that is, frequent showers and sunshine, all plants will be making luxuriant growth. Care should be taken to prevent the droppings from the roof battens doing injury to tender ferns and plants.

ORCHARD.—Continue planting tropical trees from pots; and in the North, form plantations of pines and bananas. Plant out strawberries, in ground previously prepared by being trenched and thoroughly manured, treading the surface very firmly before planting. Bud all stone fruit. Thin fruit on trees too heavily laden, and prop and secure all branches which are carrying a great weight of fruit. Oranges bearing heavily would be benefited by a top-dressing of some good special manure, or by liquid manure from cowsheds and urinals, or hen manure previously mixed or dissolved in water, diluted to a weak state and applied freely or during a heavy fall of rain. Superphosphate of lime freely mixed with wood ashes and lime is an excellent dressing to apply to an orange in wet weather, when the trees are bearing heavily. Collect leaves or waste vegetable matter for leaf mould to be used when planting fruit trees during the approaching winter.

FIELD.—Continue to prepare land, ploughing it deeply. Lucerne may be sown in clean, well-ploughed soil; drilling is recommended in place of sowing broadcast, so as to admit of hoeing. Vetches or tares, Cape barley, and sorghum should be sown for green food for stock. If sheltered, and in a warm position, 90-day maize may be sown. Early potatoes may be planted whole. Sulphate of lime or "superphosphate" applied to the soil, greatly increases the health and productiveness of potatoes. Keep the land clean, and hill up maize.

PLANTATION.—Most of the instructions for last month still hold good, except that planting cane in the South is now risky.

MARCH.

GARDEN, ORCHARD, AND FARM CALENDAR, AND DIARY.
 { The blank half of this page is intended for Notes, such as the sowing of seeds, the blooming of plants, planting and other garden operations.

GARDEN—VEGETABLES.—If previous instructions have been followed, the seed beds will be full of young plants, and there will be sufficient land well dug and manured ready to receive them. Plant out cabbages, cauliflowers, Brussels sprouts, celery, etc., in favourable weather, that is, just before rain (evening time is best), choosing the largest and finest plants. Keep the beds free from weeds by frequent and deep hoeing. Give asparagus beds a slight dressing of salt, and fork in plenty of decomposed manure. Transplant escalots. Sow English beans, French beans, beet, carrot, mustard and cress, celery, lettuce, endive, leek, onion, peas, parsnip, parsley, radish, prickly spinach, turnip, couve tronchuda, savoy, and so forth. Divide herbs. Beds deeply trenched and well enriched with manure, should now be made for asparagus or rhubarb, either of which will thrive better, and be more readily and thoroughly prolific if never transplanted.

FLOWERS.—Still follow up the plan of utilising the borders during winter and spring, with favourite annuals, by enriching the soil with decomposed manure or bone dust, and sowing the seeds or transplanting the young plants in suitable weather. For a good display of pansies, asters and mimulus, sowing should not be later than this month. The further North one goes, the more does this apply. Chrysanthemums are now showing signs of buds, and where quality is desired, all side shoots and many of the buds should be pinched out. Preparations should now be made also for a good bed for cuttings, by providing a patch of friable soil, and some artificial shade for it, and through the winter, it would render much service for striking cuttings of all choice plants, roses, shrubs, etc. This bed must not be in the vicinity or shade of large trees, and should be protected from westerly winds. Caladiums, gloxinias, and other bulbs should now be very sparsely watered; the pots can be placed on their sides as the plants or leaves die down.—Honeysuckle, many of the rose family, feather palm (*cocos plumosa*), antigonon, Japan lily, and the yucca (Adam's needle) flower during this month.

BUSH-HOUSE OR SHADE GARDEN.—Now is a good time for forming one. Taste, ingenuity and skill are great adjuncts to success with these artificial aids to comfort and luxury. More individuality and less imitation brought to bear on these structures, would probably develop some new and valuable ideas. The real value of these structures is hardly realised yet, so an effort to make them of some more durable and permanent material would be a step in the right direction. They should never have any living shade over them, nor yet anything growing near them like passion vines or greedy feeding shrubs or trees, or the soil within will be impoverished.

ORCHARD.—Fruit trees or vines that have been sickly or unproductive during the season, should now be seen to, so that they may be manured, syringed, scrubbed, pruned, or grubbed out, as the case may demand. Plant out strawberries; it is advisable to use new ground as a strawberry bed. A spade should never be used in an orchard or orangery, being likely to damage the roots of fruit trees. A fork is the proper implement. All land intended to be planted with fruit trees during the approaching season, should be trenched and manured this month if not already done. All stiff and retentive soils should be carefully drained, at least six inches deeper than they are trenched, regardless of the inclination of the surface.

FIELD.—Sow lucerne, clover, rye grass, prairie grass, oats, barley, wheat, vetches or tares, and sorghum. Sow main crops of potatoes in all the warmer districts of the State. Hoe early potatoes, gather maize as it ripens; cut tobacco leaves as they arrive at maturity. Sow mangolds, Swede turnips, and kohlrabi for winter food. In the North, maize, tobacco, *setaria germanica*, and teosinte may still be sown.

PLANTATION.—In the North, great activity in planting will still continue, both with sugar-cane and tobacco, and where rhea cultivation is thought of, the time for breaking up and preparing land for the cuttings is now at hand.

APRIL.

GARDEN, ORCHARD, AND FARM CALENDAR, AND DIARY.

{ The blank half of this page is intended for Notes, such as the sowing of seeds, the blooming of plants, planting and other garden operations.

GARDEN—VEGETABLES.—Directions for last month still hold good, and in the cooler districts of the far North this is the best season for planting potatoes, and growing some of the leading winter vegetables, such as cabbage, lettuce, carrots, radishes, peas and kidney beans. Keep down weeds by continual hoeing. Divide and plant out pot herbs, giving water if requisite, until they are established. Plant out cabbages, cauliflowers, etc., in favorable, that is, showery weather. Sow English beans, mustard and cress, lettuce, endive, leek, onions, peas, radish, etc., for succession.

FLOWERS.—Many annuals should now be up strong enough to handle, and judicious thinning is very important. One or two plants in each place is ample, for they will make as large and as floriferous a display as fifty. Plants not wanted in any patch may be transplanted. Petunias and geraniums, and other hardy flowering and soft-wooded plants may be struck freely now, by putting cuttings in where they are to remain. The petunia strikes freely enough now, but sometimes does not again transplant well; this, therefore, should be borne in mind. To rose cuttings the same remarks apply. Some varieties—such as Marechal Neil—strike freely, but succumb on being disturbed; the safe way of dealing with them, therefore, is to put the cuttings where they are to remain, of course, into some soil adapted for encouraging root growth. Those wishing to grow good asters or pansies, will find a shady border under a fence and an additional shading of boughs or calico of very great service. Violets want all the cold they can get in Queensland to flower freely. The transplanting of flowering shrubs and roses may now be attended to. Chrysanthemums should now be flowering freely, and may be greatly helped by the application of weak liquid manure about twice a week.—The climber or creeper known as Quisqualis, or Rangoon creeper, should now be in full bloom, and forming a most effective arbour decoration. Late planted dahlias, early chrysanthemums, and amaryllis, are also in flower.

BUSH-HOUSE OR SHADE GARDEN.—The shading must not be too dense now, or it will be destructive or weakening to plant life and especially to floriferousness. Vacancies may at any time be filled, and taste and attractiveness displayed in furnishing suitable variety of flowers in season. Much needed propagation should now be attended to. For both ferns and orchids, a few clumps of peat will be found invaluable as a base for them to rest on.

ORCHARD.—Where practicable, the transplanting of fruit trees can now be undertaken; and, if done with care, with as much earth as possible round the roots, they will soon emit new roots, and be established in their positions before the final fall of the leaf. This applies especially to evergreen fruit trees, such as lemons, oranges, mangoes, loquats, olives, tamarinds, etc. In transplanting take care that a sufficiently large hole is dug, to allow of the roots having ample room; if any of the roots have been bruised or broken in the moving, let the damaged portions be cut off cleanly with a sharp knife; do not set the transplanted shrub or tree any lower in the new ground than in its original place. For some days it is well to shade it, either by matting on sticks, a bush, a bough, or any other contrivance that may answer the desired purpose. Water should also be freely applied when the tree is planted, to settle it in its new position, and only at occasional intervals afterwards, when dry weather prevails. Prop up bananas which have heavy bunches of fruit.

FIELD.—Sow vetches, lucerne, wheat, barley, oats, mangold and Swede turnips. Gather sorghum and imphee as they ripen, or the birds will either consume or scatter the seed. Plough land for future crops. Cut and house tobacco as soon as it arrives at maturity.

PLANTATION.—In the South, the work consists in getting ready for garnering and manufacturing arrowroot or sugar; in the North, cane planting or setting out tobacco may still proceed if the weather be showery. Coffee planting may be attended to in the North, also at any time that soil moisture shows it to be advisable.

MAY.

GARDEN, ORCHARD, AND FARM CALENDAR, AND DIARY.

{ The blank half of this page is intended for Notes, such as the sowing of seeds, the blooming of plants, planting and other garden operations.

GARDEN—VEGETABLES.—Transplant onions, garlic, eschalots, rhubarb, &c. Sow lettuce, endive, leek, onion, peas, radish, mustard and cress, cabbage, turnip, carrot, parsley, and pot herbs. Prepare beds intended for asparagus, choosing the best soil the garden affords, and the ground must be dug deep and most plentifully manured. Rhubarb may be planted also, in deep-dug, well-manured beds. The onion crop sometimes suffers severely from the ravages of a green grub, which is in some soils in large numbers. Land intended for this crop should be previously examined for these pests, and, if possible, receive a dressing of soot, which would be a valuable manure for the onions. In the tropical North, only a few things which mature rapidly—say in a few weeks, or at most two or three months—are worth trying; eschalots, lettuce, radishes, cabbage, turnips, and carrots, of those above mentioned, and sweet corn, kidney beans, and English or sweet potatoes being also serviceable.

FLOWERS.—The seeds of hardy English annuals may still be sown, but the results from those put in now will not be equal to others sown months earlier. Continue planting roses and flowering shrubs, and attend to all needful pruning, putting in the cuttings in the cutting beds before mentioned, prepared for propagation purposes. Plant all spring flowering bulbs and tubers, and mark the place sufficiently, and in the case of gladioli, with a stake suitable for the plants to be tied up to. Plant hedges of *Duranta* or the African box thorn; the former will do in cuttings, and should be planted thickly; the latter in seed.—The poinsettia pulcherrima should now be showing its brilliant bracts; the hibiscus is also in flower. Camellias are now in full bud or bursting into bloom; they should be watered freely to prevent dropping of the buds.

BUSH-HOUSE OR SHADE GARDEN.—If this retreat has been seasonably attended to, it will now be gay with such flowering plants as fuchsias, begonias, pansies, and other favorites, and cinerarias and primulas will be ready to do their best presently. All watering at the roots with liquid manure, not at all strong—weak, but often is the rule; much harm is frequently done by using liquid too strong. Gradually withhold water as the weather becomes colder, in order to allow the plants, ferns especially, to rest.

ORCHARD.—Transplant fruit trees and evergreen shrubs; do not plant too deep; put fine mould among the roots, making it firm with the foot, and using water copiously afterwards to settle the soil among the roots, unless the soil is wet. Transplant strawberries into soil enriched with leaf mould or well decayed cow dung, giving them abundance of water during their fruiting season. In cold situations, protect tropical fruit trees, and throw a little hay over the pineapple plants, with the same object. Prune fruit trees as they lose their leaves and the wood seems ripe and firm. The trunks and limbs may be painted with a dressing as a preventive against insect pests. A mixture of equal parts of soft soap, sulphur, soot and clay made into a thin paste with water has been recommended.

FIELD.—Sow vetches, barley, oats, rye, wheat, also lucerne and other grasses. Cut tobacco, and continue planting it out in the North. Earth up potatoes (in some cases this is better dispensed with). Rye as green fodder is much relished by cattle and horses, and if not allowed to go to seed will make a good sward for grazing over, being green and succulent during winter and early spring.

PLANTATION.—During the month, in the South, cane crushing and arrowroot manufacture will require best attention; and the cane will also come in for its manipulation soon in the North. Coffee will now be ripening, and will require to be gathered and treated without delay. Where fresh plantations are required, good seed beds should now be made under a dead shade, and seed sown should provide plants for transplanting during the moist weather of summer. Plantations of rhea may still be made from cuttings, if the soil moisture is sufficient to warrant it. Cane planting may still be done in the North, also tobacco and maize may still be sown. All new work in clearing and breaking up fresh land should be pushed on vigorously while winter lasts.

JUNE.

GARDEN, ORCHARD, AND FARM CALENDAR, AND DIARY.

The blank half of this page is intended for Notes, such as the sowing of seeds, the blooming of plants, planting and other garden operations.

GARDEN—VEGETABLES.—No colonial grown cabbage seed should be sown until the latest sowing takes place, as it runs to seed when the plants are ready to heart. The English seed does not run until the second season, and will, therefore, heart perfectly. Transplant horse-radish, eschalots, rhubarb, strawberries (if not already done), seakale, etc. Sow brocoli, Brussels sprouts, cabbage, red cabbage, cauliflower, lettuce, endive, peas, English beans, radish, etc. To grow watercresses, dig a trench as if for celery; turn in abundance of well-decayed manure, at the bottom, sifting some fine soil over it, and dribble the cuttings in at a foot apart, giving the whole a good watering. They must be well watered afterwards about twice a week; and if a leaning shade be erected over them on the sunny side it will be of service. Cabbages, carrots, lettuce, radishes, turnips, sweet corn, and sweet potatoes, are still serviceable for the North.

FLOWERS.—The sowing of annuals becomes risky and doubtful now, except a few which are proving very hardy in Queensland. If moisture be plentiful in the soil, however, and the land well enriched to cause a rapid development that will materially alter the case. As a rule, however, annuals sown now, unless tender ones adapted to the summer growth, are newly-planted shrubs or trees sufficiently to keep not likely to give satisfaction. Beds and borders should be dug over. Finish the pruning and transplanting of roses and flowering shrubs, and water all the soil moist, but not more. Too frequent application of water to plants not freely growing is often death rather than life to the roots. Fill up the cutting bed now with choice cuttings, and water them sufficiently at first to keep the soil moist about them, but not more. Violets should now be at their best; and in cool situations the English primrose may be got to flower, even in the neighborhood of Brisbane.—Dwarf nasturtiums should be flowering freely during this and the two following months. Poinsettia, Dombeya and Erythrina should be flowering.

BUSH-HOUSE OR SHADE GARDEN.—Finish making alterations and additions as soon as possible now, and attend to the directions given for the last two months. Fill up vacancies with ferns, lycopods, and orchids; (as regards the latter, Dendrobiums and other epiphytes should not have the roots too closely covered up), and remove everything unsightly, or the effect is easily destroyed by a little negligence and slovenliness. Re-pot ferns. As the weather particularly at night time, is now getting cold, the westerly side of the house should be protected by matting, and watering done in the middle of the day.

ORCHARD.—Orange trees which are not in good health should have their trunks and large branches scrubbed with a scrubbing brush, and washed clean before the spring growth commences. The surface soil to the full circuit of the foliage of the tree should have a dressing of stable manure. Apple trees affected with American blight should have the earth removed from the roots near the surface, and they should be painted with castor oil, or strong soap and resin wash. Some sorts of apple are "blight-proof," and these should have the preference when planting, as far as practicable; and the others should be worked upon stocks which are blight-proof. Transplanting fruit trees and vines should be proceeded with vigorously. Prune fruit trees and vines, and protect bunches of bananas in cold situations.

FIELD.—The arrowroot will fill out rapidly as the cold checks the growth at the top. Sow oats, lucerne, rye grass, vetches, prairie grass, etc. Prepare land in warm situations for sowing with maize, and planting with potatoes next month. Early sown wheat often escapes rust and other ills which affect later crops. It is late for maize and potatoes in the far North, unless done at once.

PLANTATION.—The advice given last month is of equal value for this, everywhere in the South, for the weather will still be too cold to allow of planting fresh breadths, and only gathering crops or breaking up new land can yet be done profitably. In the North, the weather is likely to be too dry in most places for successful planting, and as the busy time for cane crushing is commencing, planting may stand over in most cases.

JULY.

GARDEN, ORCHARD, AND FARM CALENDAR, AND DIARY.

{ The blank half of this page is intended for Notes, such as the sowing of seeds, the blooming of plants, planting and other garden operations.

GARDEN—VEGETABLES.—The seeds for sowing this month are limited to those which either mature quickly or endure heat well. Except on the Downs, cauliflower should not be sown; cabbages, carrots, parsnips, beet, peas, lettuce, radishes, mustard and cress, turnips, onions, leeks, and herbs may still be sown. In well prepared ground, asparagus and rhubarb seed may be sown; the plants from seed, in either case being much more vigorous and prompt in maturing if not transplanted. In the North, a final sowing of sweet corn should be made this month, and also the last sowing of cabbage, lettuce, radishes, turnips, and kidney beans. When sowing seeds after rain see that the land is in a friable condition. If too wet it will clog and bind together. The soil should never be walked over or disturbed, by sowing or digging the crops until it is sufficiently dry to be friable. Plant out onions and eschalots. Three or four days after planting rake the soil between the rows in dry weather—it will kill thousands of weeds.

FLOWERS.—The sowing of English annuals should now be over, the varieties seasonable being such as portulacca, balsams, cockscombs, amaranthus, a few annual phloxes and may be also Indian pinks. Amaryllis, gladiolus, alstroemeria may still be planted. Early sown annuals will now be in bloom, and those wishing to save good seed from them, should ruthlessly uproot every indifferent flower, or the strain of seed must degenerate. Finish the planting, pruning, and propagating of roses and shrubs; hedge planting should also be finished.—The wigandia is now in flower, and many roses should be blooming freely. Other plants in flower are jonquil, narcissus, iris, and similar spring flowering bulbs.

BUSH-HOUSE OR SHADE GARDEN.—There should be plenty of bloom in a well-tended bush-house now, as begonias, cinerarias, primulas, pansies, fuchsias, violets and mimulus are in season, and should have frequent waterings with weak liquid manure. Never neglect an opportunity of adding to the fernery, if only by weeding out something inferior to substitute a better. A well-ordered fernery is a greenery everywhere the eye may chance to alight. This is usually one of the most trying months of the whole year for bush-house plants from the cold westerly winds that commonly prevail. Both here and in the open garden precautions should be taken against frost.

ORCHARD.—Finish pruning fruit trees and vines and burn any cuttings that appear to be diseased. After pruning, the vine stems may be dressed with a wash of lime, soft soap and sulphur. Plant out fruit trees and vines, and cuttings of grape vines, and such trees as are propagated in that manner. Graft young orange trees. The Seville orange forms the best stock upon which to graft approved sorts. Prepare land hitherto neglected, that all planting may be finished at the end of next month if possible. Eradicate docks, and give a dressing of salt to the vines and fruit trees, lightly forking in well decayed manure where necessary.

FIELD.—Finish planting lucerne as early as possible. Sow oats, vetches, etc. Prepare land for potatoes, maize, tobacco, sugar-cane, carrots, man-gold wurzell, chicory, etc. Plant potatoes and maize. Take up and prepare arrowroot as the crop matures, and as soon as convenient, get in the seed for next season's crop. Plant cuttings of *Jatropha manihot* for tapioca. In the North, plant sweet potatoes, and if moist enough, sow rice, millet, and teosinte.

PLANTATION.—As sugar manufacture is now in full swing, soil preparation and planting will be as much as possible deferred; still, where it is at all possible to get out-door work in the soil done, determined effort should be made in such cases to compass it. Timely work is everything in profitable cultivation. Cane planting may be deferred a month or two, yet the plant would mature earlier, and the juice acquire a better density, if earlier planting were done. Tobacco planting in the North should be advanced almost to first crop now, and watchfulness therefore be called for to secure quality, the only way to realise profit thereby. Cleanly and thorough cultivation yields good returns always in plantation, garden, or field.

AUGUST.

GARDEN, ORCHARD, AND FARM CALENDAR, AND DIARY.

The blank half of this page is intended for Notes, such as the sowing of seeds, the blooming of plants, planting and other garden operations.

GARDEN—VEGETABLES.—Peas sown this month should have a cool aspect. A dressing of salt at this season, at the rate of 7 or 8 lbs. to the perch, would be of great advantage to moist soils, tending to sweeten the land, retain moisture, destroy insects, and discourage weeds, fungus, and mildew. Sow beet, melon, cucumber, lettuce, okra, parsley, pumpkin, vegetable marrow, radish, rhubarb, round spinach, tomato, tobacco, carrot (large sowing), leek, cabbage, kidney bean, turnip, parsnip, etc. Plant out horseradish, rhubarb roots, herbs, sea-kale, asparagus, Jerusalem artichokes, ginger, etc. Destroy weeds while young; syringe with Gishurst compound, or with strong soap suds in which a little kerosene has been well mixed, plants which are attacked with aphid; an hour or so afterwards, it is as well to syringe the plants again with plain water. In warm localities South, sow sweet corn and rosellas, the later in a bed for transplanting.

FLOWERS.—Watering in dry weather is now very advantageous, taking care that the water be got to the roots. If no other plan can be devised, a piece of an old broom handle pointed and used to make a funnel-shaped opening into the soil, will render efficient service, the hole at the top being covered with a stone or something to hide it and enable it to be used again. All transplanting will need to be done with greater care now, as the heat increases, or the tender plants will succumb. See that recently planted roses and shrubs are moist at the roots. Never apply liquid manure to the roots of a plant not healthy or in vigorous growth. Precautions should be taken to protect plants and shrubs in the event of the weather being severe.—The *Bignonia venusta* with its orange racemes is now an attractive object, and were it not so common would be more highly thought of. Several of the dendrobiums (orchids) ought now to be in full bloom. *Photinia*, *anemones*, *freesia* and other Cape bulbs, *hyacinth*, also *asters*, *pansies*, *cosmos*, and many early sown annuals, are also flowering.

BUSH-HOUSE OR SHADE GARDEN.—In warm and sheltered localities, specialties in coleus, *caladiums*, and *crotons* should be in place, and *gloxinias*, *achimenes*, and *tydeas* be planted. Fine bone-dust is an excellent invigorator of fern borders, and if mixed with peat, wonderfully assists the finer sorts. Bone-dust and powdered charcoal with a peat base is excellent for all ferns and orchids requiring rooting material. Ferns may be raised by sowing the seeds (spores) on the surface of fine soil in a flower pot or seed pan, which should be covered with a piece of glass and kept moist by being occasionally placed in water, this being far preferable to watering on the surface; or better still by sowing the spores on peaty clumps of dead stag or elkhorn ferns.

ORCHARD.—Endeavour to finish planting fruit trees, vines, and other plants, as the sun will be gaining power, which will increase the labour and risk. Young orange trees which show too much bloom should have it removed, and receive a little liquid manure to produce foliage. If any of the orange trees are affected with the aphid, they should be well syringed with water in which a small quantity of soft soap and sulphur have been dissolved. A small quantity of kerosene in a bucket of hot water (say about 140deg.) has been found very effectual against scale, blight, etc. It should be well mixed, syringed on the trees, but kept from the roots. This syringing should be done either before blossoming or after the fruit has set. Air-slaked lime dusted on the trees is sometimes found very useful. Graft China pears, as they break very early. Keep the land clean and the surface open.

FIELD.—Keep the crops clean. Plant potatoes, maize, rice, yams, arrowroot, etc. Hoe up slightly potatoes. Sow sorghum, imphee, teosinte, and tobacco. Silkworms will now require constant attention, feeding them frequently with young tender leaves. Earth nuts are a profitable crop in a light friable soil, especially near the sea shore, and in soil having lime in it.

PLANTATION.—In the South, planting, except in the case of arrowroot, may be profitably deferred. All land intended for planting should now, however, be in readiness or nearly so. In the North, the planting of sugarcane, rhea, and tobacco should not longer be deferred.

SEPTEMBER.

The blank half of this page is intended for Notes, such as the sowing of seeds, the blooming of plants, planting and other garden operations.

GARDEN—VEGETABLES.—Destroy all summer weeds as they make their appearance, and so keep the land thoroughly clean. Take every opportunity to collect manure of all kinds, to be thrown into well puddled tanks, to rot down for use in autumn and winter. During the summer months in this State, manure should be generally applied in the liquid form. A cask sunk in the round, with hen manure or cow dung thrown into it and water added, and occasionally stirred, will afford a ready supply. See that crops are not planted too closely to be crowded. Trench vacant land in preparation for future crops, leaving the surface rough, to mellow by exposure. Sow French beans, parsley, beet, capsicum, chili, cardoons, lettuce, egg-plant, okra, sweet corn, Cape gooseberry, radish, round spinach, tomato, tobacco, cucumber, melon, pumpkin, vegetable marrow, carrot, parsnip, etc. Transplant cabbages, eschallots, etc. Plant Jerusalem artichokes, rhubarb roots, seakale, asparagus, ginger, earth nuts, etc. Sow rosella. Plant sweet potatoes. On the Downs, plant English potatoes.

FLOWERS.—Make edgings of alternanthera as the weather gets warmer and moist, and plant out ribbon and carpet designs in flower borders, with coleus and other suitable foliage and flowering plants. Watch for green fly on rose bushes, and elsewhere, and apply soft soap and water with a syringe to destroy them; be careful that the mixture is not too strong. Syringe with plain water a little time afterwards is recommended. Fill up borders with tender plants for summer ornamentation and display. Attend to cleanliness and neatness everywhere. Dahlia bulbs may now be planted taking care that the colours are properly grouped for effective display. Stout stakes for their support should be put at the time of planting. Chrysanthemums should now be divided and planted out, though frequently later planting will be found better. Azaleas should now be doing their best, also pansies.—*Magnolia fuscata* (known as the port wine plant) is in bloom; and among the climbers the wistaria is very noticeable. *Gladiolus*, *amarylis* and lilies, also many roses, camellias, and azaleas, are flowering.

BUSH-HOUSE OR SHADE GARDEN.—Remove all decaying stems and fronds of ferns, as they furnish a lurking place for mealy bug, thrip, and scale, which are a scourge of many of the fern family. A sponge, moist with a solution of soft soap in water applied to fronds thus affected, is at times needful. As the heat increases take care that the roof shading is sufficient. Re-pot large ferns, and where necessary replenish the soil with new soil, composed of leaf-mould or scrub soil with a large proportion of sand.

ORCHARD.—In dry weather, give recently planted fruit trees sufficient water at the roots at intervals, leaving the surface to be kept damp by a mulching of stable litter. Destroy all caterpillars that infest the vines about this time. Attend promptly to the disbudding of grape vines; removing all suckers and superfluous shoots as soon as they appear. Tie up fruiting shoots to the trellises as they advance in growth. Graft apples and pears. The strawberry plants will need attention in the way of weeding and watering.

FIELD.—Keep the land clean and loose among growing crops. Plant arrowroot, yams, sweet potatoes, tobacco, etc. Sow imphee, sorghum and maize for green fodder. The sunflower may now be sown. Continue planting and hill *slightly* potatoes, especially in the cooler districts. Finish cotton pruning.

PLANTATION.—As the warm weather advances, the planting of tea, coffee, allspice, cinnamon, cocoa, as well as all tropical fruits and shrubs should be attended to, in tropical or sufficiently warm localities. When newly planted and firmed with the foot afterwards, saturate the soil with water, and then apply a coating of mulch to prevent the surface from caking, and the moisture from evaporating. Some light shade to the foliage until the plant takes hold of the soil is also necessary, to give the nursed and tender plants every chance. In the South, plant tobacco and sugar cane; in the North, sugar cane, and keep the soil everywhere in as good a state of tilth and openness as possible, to catch all the moisture available in dews or showers.

OCTOBER.

GARDEN, ORCHARD, AND FARM CALENDAR, AND DIARY.

The blank half of this page is intended for Notes, such as the sowing of seeds, the blooming of plants, planting and other garden operations.

GARDEN—VEGETABLES.—Keep crops clean, mulch them and give water where necessary, and if watering be attempted, it must be more than a mere sprinkling of the surface, for that does more harm than good. Sow parsley, French beans, lettuce, okra, radish, round spinach, beet, vegetable marrow, melon, carrot, cucumber, tomato, rosella, etc. Sow St. John's Day cabbage, which is the best for summer culture, being early, hardy, of fair quality, and withstanding heat, dry weather and aphids better than any other. Convert all waste vegetables into manure in some form—either to feed pigs, or throw them into the manure tank or cask to rot. In the warmer districts of the State, only the Chinese spinach, Chinese long or Fiji beans, or Madagascar beans, are worth cultivation, now that heat is in the ascendancy. Sweet potatoes may be safely planted everywhere now.

FLOWERS.—The main work in the borders now, is watchfulness for weeds and seeds of annuals, and keeping things generally tidy and neat. Only such planting as is seasonable, which consists in transplanting tropical annuals and biennials, or in propagating the same from cuttings should be attempted. Clip *duranta* hedges, and plant hedgings of *alternanthera* when moisture permits. Always keep a supply of good compost ready to put about the roots of choice plants when putting them out into the borders, or for sowing choice seeds in. English annuals of all kinds should now be making the garden gay. Phlox, pansies, verbena, stocks, sweet William, carnation, candy tuft, mignonette, mimulus, poppies, petunia, lobelia, and many others; also the flaming lily (*amaryllis*), others of the lily family, and fuchsias. The *jacaranda* is now a blaze of ethereal beauty, and among climbing plants, the Chinese jessamine (*rhynchospermum jasminoides*) is prominent both from its scent and appearance. Oleander, bougainvillea, deutzia, gardenia and pomegranate too are in flower. Take up bulbs as soon as the leaves are withered, and store them in a dry place where neither ants nor rats can reach them.

BUSH-HOUSE OR SHADE GARDEN.—These structures in the North could be made serviceable for growing salads, French beans, and many choice vegetables as luxuries for the table. That will come to be one of their uses in tropical situations yet. Their use as luxurious and ornamental retreat for producing many of the beauties of nature is already known and somewhat appreciated; but there is great scope remaining for the improving and inventive powers and taste of man to work, in greatly enriching them in every way, both as to their contents and designs.

ORCHARD.—Thin out the fruit on China peaches of all kinds, and carefully eradicate the suckers which spring from the root. Attend to disbudding, that is, removing superfluous shoots from fruit trees of all descriptions, as it is of great relief to the tree in every way. Remove all the strong watery shoots (which fill up the inside of the tree), so as to admit sun and air, and leave the whole strength of the plant to mature the crop. Support the branches of the tree as the fruit swells. Examine the orange trees, and if either thrip, smut, coccos, or fungus, appear on the stems, scrub them as recommended in June. For the orange bug hot soap suds may be tried. Tie up the vines as they grow, being careful not to injure the foliage (which performs the functions of both lungs and stomach for the plant), and see that the fruit is sufficiently protected from the direct rays of the sun. It is a good plan, in order to secure fine fruit, to thin out with a pair of sharp-pointed scissors, some of the grapes in overcrowded bunches. Sulphur the vines on the first appearance of oidium; do this in the early morning while the dew is on the vines. Plant cananas and pine apples. Trench and drain the land intended for planting fruit trees in the winter; and if well cultivated, one crop taken from it would improve its texture.

FIELD.—Clean and earth up growing crops. Plant yams, earth nuts, ginger, and sweet potatoes. Sow sorghum, imphee, maize, *setaria germanica*, and in the warmer districts, teosinte.

PLANTATION.—As showery weather permits, attend to the planting of coffee, arrowroot, tapioca, sugarcane, and tobacco. Let the cultivation be liberal, if good returns are to be looked for; but for it to be truly liberal, it needs to be done intelligently as much as freely.

NOVEMBER.

The blank half of this page is intended for Notes, such as the sowing of seeds, the blooming of plants, planting and other garden operations.

GARDEN—VEGETABLES.—Some of the most profitable vegetables to grow anywhere in Queensland during the summer months are the Chinese long runner beans, the Fiji bean, and the Chinese spinach. The Madagascar bean grows well during the summer. At this season the beds should have the ridges laid across the hills in sloping ground, so as to catch the showers. Thin cucumber and melon beds where overcrowded, and loosen the soil if it is bound. Fasten down the shoots with wooden pegs so as to cover the ground evenly. Sow French beans (small sowing), melon, cucumber, lettuce, okra, rosella, pumpkins, and sweet corn. Sweet potatoes may be grown anywhere this month.

FLOWERS.—Little can be done during the summer months among flowers, except the ordinary cleaning of the beds. Roses may be budded now, or layered if increase is required. Angelonia, coleus, and summer growing herbaceous plants may be divided at the roots, or struck from cuttings either in the open borders with occasional waterings, or in shaded beds made for the purpose. Some of the summer-growing annuals may be sown or transplanted, and double petunias, if particularly choice, may be slipped or layered now or during summer for transplanting in winter. Petunias do not bear removing kindly in this colony while hot weather prevails. Pansies or mimulus growing in shade will flower for awhile yet, if freely watered.—Among flower trees and shrubs now blooming are: The magnolia, erythrina vespertilio (cork tree), gardenia, stephanotis, hoya and lasianandra.

BUSH-HOUSE OR SHADE GARDEN.—Ferns will now be making vigorous growth, and will require frequent watering. If mildew makes its appearance, sulphur should be dusted on the leaves. Attention should be given to the shading, as the sun has great power this month. This, or rather the previous month, is the best time for starting a fernery or replenishing one already started.

ORCHARD.—Thin early peaches as soon as the fruit is fit for cooking. Mulch the trees a considerable distance around the stem. Plant all kinds of tropical fruit trees from pots, such as mangoes or jack-fruit. Clean out all superfluous shoots from fruit trees generally, in order to throw the whole strength of the plant into the crop; not injuring or removing any of the foliage unnecessarily. Remove suckers from grape vines, stop straggling branches, and rub off weak ill-placed shoots. If vigorous old Isabella vines have the ripest of the present season's rods pruned during this and next month, they will give a second crop of fruit. The cuttings also, if planted, will form strong roots before the planting season. The vines should be carefully watched for oidium or other disease, and if there are any signs of appearance, sulphur must be freely used. Apricots and China peaches should be budded. Plant banana and pine apple suckers. Trench land intended for planting next season, to give it the sweetening influence of the summer's sun. Where pine apples are largely grown, it will pay to thin out the suckers early this month, as it not only causes the summer stock of fruit to be larger, but the young suckers which appeared on the pruned shoots will produce winter pine apples, which sell at a high price. The most convenient implement for thinning out, is the large, strong-handled South Sea Island knife kept sharp at both sides of the point, and used with a downward thrust.

FIELD.—Keep the land clean with a horse hoe or scarifier. Stop tobacco plants as required, to direct the sap into the leaves intended for the crop, and remove caterpillars. In making oaten hay, cut the crop when well in ear, but before the seed is near mature; the whole plant is then in the best condition. In the North, millet and teosinte may be sown freely now for fodder purposes.

PLANTATION.—Much cane-planting is now generally done in the North, after the rush at the crushing is over. Early sown rice is now ready for harvesting, and will soon be growing strong for the second crop. Young coffee plants may still be planted out, if shading and careful watering be attended to. Two or three leafy boughs stuck around the young plants form the best shade for them.

DECEMBER.

The blank half of this page is intended for Notes, such as the sowing of seeds, the blooming of plants, planting and other garden operations.

GARDEN—VEGETABLES.—Seeds sown during the summer months would do better if protected from the direct rays of the sun by some light cover, a foot or two above the ground. Thin calico, or light open brushwood, not too dense would be suitable. If the seed beds were well watered, *so as to thoroughly soak the soil*, a few hours before sowing the seed, and the seed were covered by sifting over it some stable litter, there would not be so many failures, even in the summer. Sow lettuce, okra, radish, sweet corn, Chinese runner beans, and Chinese spinach.

FLOWERS.—Much of the advice given last month serves equally for this. Judicious watering is a very useful thing, but much of the watering done is more injurious than helpful, as it does not penetrate the soil to the roots, and therefore is of little good; indeed, in many cases it only cakes the surface soil. If people could only be educated to contrive in some way to get the water down to the roots, instead of squandering it upon the surface, better results would follow. A flower-pot, a jam or other tin, with a hole in it, sunk in the soil up to the rim, with a layer of stones or sticks underneath to let the water run in quickly, would be a simple contrivance for effectual watering.—The poinciana regia, bauhinia hookeri or native ebony, hydrangea, and frangipanni are now in bloom, also fuchsias, gloxinias, agapanthus, and lagerstroemia.

BUSH-HOUSE OR SHADE GARDEN.—Much of the attractiveness of a structure of this kind depends upon its tasteful ornamentation with rockeries, hanging baskets, and arrangements for all kinds of epiphytal growths. Gnarled or branched sticks are of great service in carrying stag-horn, elk-horn, and bird's-nest ferns, also for many varieties of orchids. Stone work built up grotesquely to form shady nooks and corners would be likewise of great service for growing many things unfitted for more exposed positions. And, as said before, the bush-house in the North may be coaxed into useful service, after the manner of conservatories at home, only reversing the order by creating a lower temperature than prevails outside. As it is not an easy matter to thoroughly water hanging baskets, it is recommended that every bush-house should be provided with a water trough or box, in which the basket can be plunged occasionally, in order to get a thorough soaking. A zinc-lined case, say about two feet long by eighteen inches wide and deep, will be found to answer the purpose admirably.

ORCHARD.—Thinning heavily-laden trees and dis-budding, or finger-and-thumb pruning, is the principal work needed amongst fruit trees now. Straw under peach trees will protect the falling fruit from bruising. Straggling wood shoots should be stopped, to keep the trees in form, and prevent the weaker branches being robbed of their share of nourishment. On the slightest appearance of oidium among the vines or American blight among the apples, dress them as previously directed. Those who object to the use of sulphur and lime in their dry state, may boil one pound of sulphur and one pound of lime in a gallon of water for half-an-hour; one pint of this, when strained, may be mixed with ten gallons of water, and applied to the affected vines with a syringe.

FIELD.—Keep crops clean. Dig potatoes as soon as ripe, as they will not keep in the soil; and have them collected as they are dug, or the sun will cause them to rot. Harvest wheat, oats, and barley: if left too late, the grain wastes in gathering. Finish haymaking, taking care that the hay is not over-dried, or its feeding properties are half destroyed. Sow maize, setaria germanica, millet, sorghum: in the North, teosinte and sweet potatoes may still be planted.

PLANTATION.—Cane planting may be attended to anywhere now. Coffee will need to be constantly watched, and failing plants replaced timely, to give the plot an equal start together. A hole a foot deep and the same in diameter on the uphill side of the plant, and filled with stones to the surface, is an excellent device for watering either coffee plants on a plantation, or many things besides, and were it done, a little water would achieve wonders in a dry time.

QUEENSLAND.

THE State of Queensland—formerly known as the Moreton Bay district—comprises the whole of the North-Eastern portion of the Continent of Australia; its boundaries being—on the North the Gulf of Carpentaria and Torres Strait; on the East the Pacific Ocean; on the West the Northern Territory of South Australia—the dividing line being the 141st meridian of longitude from the 29th to the 26th parallel, and thence the 138th meridian; and on the South the State of New South Wales. Its estimated area—exclusive of the islands contiguous to the coast, which, however, belong to Queensland—is about 660,520 square miles, or 428,492,800 acres, being about twelve times the size of England and Wales. Its extreme length from North to South is 1,300 miles, its breadth 800 miles, the coast line being about 2,500 miles. It was discovered by Captain Cook in May, 1770; first settled in 1824; and erected into an independent Colony on December 10th, 1859.

Registration of Births, Marriages, and Deaths.

EVERY Birth must be registered within sixty days, and every Death within thirty days next thereafter respectively; any neglect of this regulation renders the parties whose duty it is to register liable to a fine not exceeding £10. If sixty days have elapsed from the date of birth, the law requires the parent, or other person making the application to register such birth, to pay a fee of two shillings and sixpence, and to make a solemn declaration of the facts before a Justice of the Peace, prior to the registration. The father or mother ought to sign as informant. If unable to write, let a mark be made. No birth can be registered after three years have elapsed from the date thereof; but a record will be made in the Registrar-General's office if reliable information be supplied by the parents respecting such birth.

Every Minister who has celebrated a marriage must, within one month thereafter, transmit (in accordance with the Act 28 Victoria, No. 15) the original certificate to the Registrar of the District in which the marriage was celebrated, and every Minister who fails to transmit the certificate to the District Registrar is liable to a fine of not LESS THAN £10, and not exceeding £50. Marriages must be solemnised between the hours of 8 a.m. and 8 p.m. Persons under age must produce the written authority of parents or guardians, signed by them in the presence of a Justice of the Peace, Registered Minister, or District Registrar, or the marriage cannot take place.

In every case of Burial, the Minister or person officiating at any religious service at such Burial, ought to receive from the undertaker, or person having charge of the funeral, a certificate from the District Registrar, certifying the registration of the death, unless in the case of inquest, when a certificate from the Coroner or Magistrate holding the inquest will be sufficient; and if any dead body shall be buried without such certificate, the person who may bury the same, or perform any funeral or religious service for the burial, or who shall in any way dispose of the body, shall forthwith give notice of the facts to the District Registrar. Undertakers are bound, under a penalty not exceeding £10, to lodge with the District Registrar, IMMEDIATELY after the burial a certificate of such burial, signed by themselves and COUNTERSIGNED BY TWO WITNESSES.

PASSENGERS.

GENERAL INFORMATION.

Children under five years of age will be permitted to travel free. Children of five years of age and upwards, but under fourteen years of age, will be permitted to travel at half the full fares.

Passengers starting from any station at which tickets are issued must, before entering a railway carriage, provide themselves with proper tickets; if they are unable to produce proper tickets on demand, they will be liable to pay the fare from the station whence the train started.

AVAILABILITY OF SINGLE TICKETS.

Single tickets for distance of 50 miles and under are available only for the date on which the tickets are issued.

Single tickets for distances over 50 miles and under 150 miles are available for seven days after date of issue, and for distances 150 miles and over fourteen days; but in either case the journey must be commenced on the date of issue.

AVAILABILITY OF RETURN TICKETS.

Return tickets will be issued between all railway stations, and shall be available as follows:—10 miles and under, day of issue only, except when no train is available for return, in which case they are available for the following day; 11 miles to 50 miles, 2 weeks, exclusive of the day of issue; 51 miles to 150 miles, 1 calendar month, exclusive of the day of issue; 151 miles to 300 miles, 3 calendar months, exclusive of the day of issue; over 300 miles, 6 calendar months, exclusive of the day of issue.

The forward journey must be commenced on the date of issue and completed within the period for which a single ticket is available.

Return tickets between South Brisbane, Vulture Street, Gloucester Street, or Park Road and Southport, and Mount Morgan and Tanby, are available for one calendar month.

Return tickets to any of the following watering places under 11 miles distant, viz.:—Wynnum, Wynnum South, Manly, Birkdale, Wellington Point, Ormiston, West Cleveland, Cleveland, Southport, Nudgee, Sandgate, Pialba, Broadmount, or Enu Park shall be available for return for one week.

BREAK OF JOURNEY.

Passengers holding return tickets for any distance may be allowed to break their journey at any station, provided the journey is completed within the period for which the tickets are available. But the forward journey of return tickets must be commenced on date of issue, and completed within the period for which a single ticket is available.

Any passenger desirous of breaking his journey must deposit his ticket (for which a receipt will be given if required) with the station-master at each station where the journey is broken, the ticket being returned to him on resuming his journey.

Passengers holding excursion tickets to places distant 200 miles and over may break the forward journey, provided they travel not less than 100 miles on the day of issue. The forward journey must, however, be com-

pleted within the period for which a single ticket is available. In all other cases, passengers holding excursion tickets are not allowed to break their forward journey unless it is impossible to complete it on the day the tickets are issued, in which case they must proceed by the first available train thereafter; or, to avoid a break, they may be permitted to obtain and use their tickets on the day preceding the day appointed for their issue. The return journey, however, may be broken as stated above.

NEWSPAPERS.

Definition of Newspaper and Supplement.

A newspaper shall mean any publication known and recognised as a newspaper in the generally accepted sense of the word, and printed and published within the Commonwealth for sale if—

- (a) it consists in substantial part of news and articles relating to current topics, or of religious, technical, or practical information; and (b) it is published in numbers at intervals of not more than one month; and (c) the full title and date of publication are printed at the top of the title and the date of publication are printed at the top of every subsequent page.

A publication printed on paper and issued as a supplement to a newspaper shall be deemed to be a supplement and to be part of the newspaper if—

- (a) it consists in substantial part of reading matter other than advertisements, or of engravings, prints, lithographs, or coloured supplements; and (b) it is enclosed in each posted copy of the newspaper with which it is issued; and (c) it has the title of the newspaper with which it is issued printed on the top of each page of letterpress; and (d) it is not of a size or form which makes it inconvenient for carriage or delivery by post.

Registration of Newspapers.

The proprietor, printer, or publisher of any newspaper, as defined by Section 28 of the Post and Telegraph Act, 1901, may register it at the General Post Office of any State subject to the following conditions:—

- (a) The application for registration must be made in writing. (b) It must contain a description of the newspaper to be registered, and show at what intervals the same is or is intended to be published. (c) It must be accompanied by a copy of the newspaper to be registered, and a fee of 5s.

The Deputy Postmaster-General of such State may from time to time, subject to appeal as hereinafter mentioned, revise the register, and may call upon the proprietor, printer, or publisher of any publication, a posted copy of which contains indecent or obscene matter, or which by reason of the proportion of advertisements to other matter therein or for any other reason is not within the foregoing definition, to show cause why such publication should not be removed from the register, and if sufficient cause be not shown he may remove it accordingly, and any publication for the time being on the register shall be deemed a registered newspaper. Publishers of registered newspapers are required to print on the first page of each copy issued the words "Registered at the General Post Office, , for transmission by post as a newspaper."

No publication which after the expiration of one month from the 1st December, 1901, is tendered for transmission at any Post Office in the Commonwealth shall be sent by post as a newspaper unless the foregoing provisions have been complied with.

Any proposed change in the form of a newspaper must be submitted for the consideration of the Deputy Postmaster-General.

Any Deputy Postmaster-General may refuse to transmit or deliver any issue of a publication if such issue contains indecent or obscene matter.

Any posted newspaper found to contain indecent or obscene matter may be destroyed by order of the Postmaster-General.

A copy of each issue of every registered newspaper in Queensland must be sent to the Deputy Postmaster-General, at Brisbane, and it shall not be necessary to prepay such copies.

All unregistered or irregularly-posted newspapers, and all newspapers having any matter which is not a supplement accompanying them, shall be treated as packets.

General Regulations.

A newspaper may be sent either with or without a cover but must be open at both ends, and there shall not be in or upon any such newspaper or the cover thereof any communication, character, figure, letter, or number (other than the words "newspaper only"; or a line drawn through any report, article, or paragraph therein; the printed title of such newspaper, the printed names, occupations, and places of business of the printer, publisher, and vendor thereof, the name, occupation, and address of the person to whom it is sent and the name of the person who sends the same), nor shall anything other than a supplement be enclosed in, or with, or accompany such newspaper or cover, otherwise such newspaper shall not be transmitted or delivered.

Provided always that any newspaper bearing on the cover or outside of the fold, any printed matter, not permitted for newspapers, may be transmitted at the rate charged for "printed papers."

If a newspaper addressed to any place within the Commonwealth be found to contain writing or any illegal enclosure, it may be forwarded to its destination charged according to its weight, with the full amount of postage at the rate to which the enclosure would properly be subjected; but if the newspaper be addressed to any place beyond the Commonwealth, it shall be sent to the Dead Letter Office. This regulation shall apply to any newspaper whether posted in the Commonwealth or received from places beyond.

Newspapers except those forwarded in bulk, addressed to several persons, to be delivered separately at each address, must not be tied up in bundles, and each newspaper must bear the proper postage.

Two or more newspapers to the same address can be tied together, but the outside newspaper or wrapper must bear on its face or addressed side the full postage for each paper, and the parcel should be tied so that the number of papers can be counted.

Newspapers (not being those forwarded in bulk) made up in packets bearing the same address can be transmitted at printed-paper rate of postage, but the weight of any such packet must not exceed 5lb.

Collected numbers of a newspaper shall not be transmitted through the post as a single newspaper, but postage must be paid on each copy contained therein.

When, owing to a great influx of newspapers, the transmission or delivery of letters would be delayed if the whole were dealt with without distinction, newspapers may be kept back until a later despatch or delivery.

Newspaper contents bills are not admissible at newspaper rate, but must be paid for at packet rate. They may, however, if properly addressed and having the requisite postage affixed, be placed under the string of the bundle of newspapers to which they refer, thus securing their delivery with the newspapers.

PACKETS.

Packets may consist of Commercial Papers, Printed Papers, or Patterns, Samples, and Merchandise as hereinafter defined.

Commercial Papers.

Commercial papers include all papers and documents *not wholly printed*, which have not the character of actual or personal correspondence, such as—Acceptances, accounts, invoices, receipts, bankers' packets, bank pass-books, or pass-books or cards connected with a Society, bills of exchange, bills of lading, drafts, drawing (not wholly printed), examination paper (corrections allowed), insurance documents (policies, etc.), invoices, legal documents (affidavits, briefs, deeds, depositions, etc.), manuscript or forms filled up in writings for printing or publication, maps (not wholly printed), music (written), notice of meetings, obliterated postage stamps, pay-sheets, plans (not wholly printed), prices current, promissory-notes signed or unsigned, proxy forms or notices, rate notices, receipts, returns or periodical statements, Savings Bank forms forwarded from a public department, Savings Bank acknowledgments closed or open, scrip, ships' manifests, specifications, spent letters (that is, letters which have clearly served their original purpose, and are at least two months old), stock sheets, travellers' cards, circulars or orders, travelling stock notices, way-bills, and other similar articles.

Printed Papers of all kinds except Newspapers.

Printed papers include all printed matter (except newspapers), such as books, magazines, pamphlets, sheets of music, visiting cards, address cards, circulars (wholly printed), proofs of printing, papers impressed with points in relief for the use of the blind, engravings, photographs, and albums containing photographs, pictures, drawings, plans, maps, catalogues, prospectuses, announcements, and notices of various kinds, and similar articles, whether loose or in book form. Printed patterns usually sent in or with a magazine or journal of fashion printed in the Commonwealth of Australia from type set up therein, or from stereotyped plates made therefrom, may be considered as part of such magazine or journal.

The following may also be allowed to pass as printed papers, viz.:—Circulars which are in other respects admissible, but which are printed or lithographed in characters resembling those of the type-writer, or are produced by means of any mechanical process from written or typewritten originals, may be transmitted at the "Printed Papers" rate of postage, provided they are handed in at the counter of a Post Office, and at least *twenty copies* precisely identical are posted at the same time. Each cover must be marked by the sender "20 posted."

All printed matter with written additions, corrections, or alterations must be sent as commercial papers, but writing in the nature of a letter or personal communication is not permissible, and if any such writing appear on the article the latter may be charged as an insufficiently prepaid letter.

Cards bearing the inscription "Post Card" shall not be allowed to pass as printed papers.

Patterns, Samples, and Merchandise.

The following and similar articles may be forwarded under this class, viz.:—Glass, merchandise, mineral specimens, natural history specimens (such as dried or preserved animals or plants, geological specimens, etc., when sent for no commercial purpose), liquids, oils, and fatty substances, ointment, soft soap, resin, dry powders, whether dyes or not, paper, parchment or vellum, patterns, live bees and live but harmless entomological specimens, samples, seeds, wedding cake (securely packed). Patterns and samples may contain the name and commercial style of the sender, the address of the person for whom they are intended, the manufacturer's or trade mark, numbers, prices, and indications relative to weight or measurement and dimensions, or to the quantity to be disposed of, or such as are necessary to determine the origin and the nature of the goods.

General Packet Regulations.

The maximum weight for a packet of commercial papers or printed papers shall be 5lb.; and for patterns, samples, and merchandise, 1lb. No packet may exceed 2 feet in length, or 1 foot in depth or breadth, or if in a roll 2 feet 6 inches in length, or be of inconvenient form.

Wholly unpaid or insufficient prepaid packets posted in the Commonwealth for delivery therein may be forwarded to destination charged with double the deficiency.

A packet may be sent through the post either without a cover (when it must not be fastened with anything adhesive), or in a cover entirely open at one end or side, or with the flap left unsealed, or fastened with a binder, or tied with string, so as to permit of easy withdrawal of the contents.

PRIVATE MAIL BAGS.

A private mail bag may be made up for any person, or for a number of persons, residing on a mail route, but beyond a mile from a post office, subject to the following Regulations:—

1. The charge for making up a private bag shall be £2 per annum, payable in advance.
2. Payments must be arranged so that renewal fees fall due on the 1st January in each year; new subscribers to pay the proportion of fee at the annual rate from the first day of the quarter in which they commence to the end of December following.
3. The bag, which must be of leather or strong canvas, must be provided at the cost of the person requiring it, and be large enough to contain all articles sent and received by post; if furnished with a lock, two keys must be provided—one for the postmaster and the other for the owner.

4. The postmaster must lock or seal the bag for despatch, and it must be returned in like manner; if a seal is used, the impression must be made known to the postmaster.

5. The bag may contain postal articles for all persons in the employ of the proprietor, or who, with the written consent of the proprietor of the bag, give written authority to the postmaster to enclose them in such bag. The person who pays for the bag shall be responsible for the unpaid postage on all postal articles contained in the bag. He must furnish receipts for such of its contents as may have been registered, and forward to the post office acknowledgments of delivery, duly signed by the addressees. The proprietor of the bag must return all correspondence for persons who have left his station or place, and also any letters, etc., enclosed in error. Every bag must have printed upon it, or upon a leather or metal label, securely attached to the bag, the name of the owner, or the place where it is to be delivered, as well as the name of the post office with which it is exchanged. When a bag is made up for a number of persons the name of one of the number, to whom the bag may be addressed, must be specified. Telegrams enclosed in a private bag may be transmitted free of postage; but other correspondence so enclosed and intended for delivery at the township where the bag is opened or for onward despatch, must bear the correct amount of postage payable thereon.

6. In case of non-payment of postage or detention of receipts or acknowledgments for registered articles, the postmaster may decline to forward any more articles of those classes.

7. A contractor is bound to convey and deliver, free of charge, all private bags given him by the postmaster or under his instruction, but he is not required to deviate from the usual mail route or road, unless instructed by the Deputy Postmaster-General, and must on no account be delayed. Should the return bag not be ready at the appointed time and place, the contractor must not wait for it.

Private Boxes.

Locked Private Boxes may be rented at the General Post Office, and where provided at other post offices, on payment, in advance, of a fee of £1, £2, or £3 per annum, according to the size of box required. Payments must be arranged so that renewal fees fall due on the 1st January in each year; new subscribers to pay the proportion of fee at the annual rate from the first day of the quarter in which they commence to the end of December following. Two keys shall be supplied with each box, but a fee of 1s. shall be charged for the use of each additional key supplied, and *keys must not be obtained elsewhere than from the Department.* On a box-holder relinquishing the use of a box he shall be required to, at once, return all keys supplied to him, as they are the property of the Postmaster-General, otherwise he shall be charged the rental fee for the box until they are returned. If a key be lost, information must at once be given to the officer in charge of the local post office and the remaining key or keys returned to such officer; when a new lock, for which a charge of 5s. shall be made, will be fitted in the box. *ad two keys supplied.* The Postmaster-General may refuse to let a private box at any time, if he considers such persons, and may cancel the tenancy of a private box at any time, if he considers such box is intended to be, or is being used for objectionable purposes. Private boxes shall be let only on the foregoing conditions, and upon any breach thereof the Postmaster-General may at once withdraw permission for the use of a box.

NOTE.—It materially facilitates the sorting, and consequently the delivery, of correspondence when it bears as portion of the address the number of the box. The Postmaster-General, therefore, invites the assistance and co-operation of correspondents and box-holders in this regard.

PARCELS POST.

LIMIT OF WEIGHT AND SIZE.—Parcels not exceeding 11lb. in weight, 3 feet 6 inches in length, or 6 feet in length and girth combined, may be accepted for transmission from and to all Parcel Post Offices in the Commonwealth, served by railway, coach, or steamboat. Parcels from or to Parcel Post Offices within the Commonwealth, not served by railway, coach, or steamboat, must not exceed 3lb. in weight; should a parcel be received exceeding that weight addressed to a place to which it is not transmissible, it must be forwarded to the nearest Parcel Post Office on the mail route, served by railway, coach, or steamboat, and the addressee be duly advised thereof. The Inland Parcel Post is not at present in operation in Western Australia, and parcels are not conveyed by horse services in Queensland or South Australia.

Parcels exceeding 11lb. in weight or of greater dimensions than those prescribed shall not be accepted for transmission through the post. Any such parcels which may be irregularly posted must not be forwarded to destination, but, if practicable, returned to the sender.

The postage must be fully prepaid by means of adhesive postage stamps, which the sender or person handing in the parcel must affix either close to the address on the wrapper, or to a label, obtainable at any post office. If the contents of a parcel be of a fragile nature, or postage stamps will not readily adhere to the wrapper, such stamps must be affixed to a tie-on label attached to the parcel. Postal officials must not affix postage stamps to the labels or covers of parcels.

In addition to the name and address of the person for whom it is intended, every parcel must bear the name and address of the sender on the wrapper thus:—From _____ of _____

The contents of parcels must be securely packed and closed in such a manner as to preserve them from injury and from injuring other parcels. Parcels containing—

- (a) *fragile* articles—millinery, toys, musical instruments, etc.; (b) *perishable* articles—eggs, butter, flowers, fish, etc.; (c) *liquids* or *semi-liquids*—medicines, oils, paints, jellies, etc.

must be so securely packed as to prevent the contents from escaping and the covers or vessels in which they are enclosed must be sufficiently strong to prevent breakage in transmission. The word "Fragile" or "Perishable," as the case may be, and the nature of the covering or vessel, and contents, must be indorsed on the outer wrapper. The edges and points of all sharp instruments must be protected, and articles which are likely to injure other articles must be packed in separate parcels. When considered necessary by the Postmaster-General, hermetically-sealed tins, and wooden packing-boxes, with a sufficient quantity of absorbent matter, must be used.

The wrappers of parcels which have become torn or damaged in transit must be made as secure as practicable. If the address of any parcel be rendered illegible, such parcel must, if possible, be returned to the sender.

A parcel intended for transmission by parcel post must not be posted in a posting box or pillar, but must be handed in at a parcel post office, and the officer to whom it is handed must check the weight, size, and postage, before accepting it; if it be not fully prepaid, or exceed the limit of weight or size it must not be accepted.

Where satisfactory arrangements can be made, parcels shall be delivered as addressed. At all other parcel post offices notice shall be given to addressees, and delivery must be taken at the Parcel Post Office. In all cases senders must advise addressees by post of despatch of parcels, so as to insure prompt delivery.

A receipt must be given by the addressee or his agent before delivery of a parcel. In the case of roadside delivery, addressees may authorise a mailman to receive and sign for their parcels at the parcel post office nearest to their address; but any such authority must be in writing, with the name of the mailman inserted.

If the sender of a parcel posted for delivery within the Commonwealth apply for its return to him prior to its despatch from the office at which it was posted, such parcel shall be handed back without charge, but the postage paid thereon shall not be refunded. If, after its despatch from the office at which posted, but before delivery to the addressee, the sender applies for the return of a parcel, the request must, if possible, be complied with, but before it is handed back to him, the sender must pay half postage at the fully prepaid rate, but not less than 6d. together with the cost of telegram of advice, if one has been required, and any other charges due on such parcel.

The following shall be the rates of postage charged on inland and interstate parcels, viz. :—

OPENING OF PARCELS AND EXAMINATION OF CONTENTS.—Parcels may be opened and examined by Postal Officers, but after so opening the examining officer must securely refasten them. In the case of parcels from places beyond the State of destination, their contents may be examined by the Customs officers in the parcel post office, and, where duties are payable, the same must be paid before the parcels are delivered. Parcels may, however, be forwarded in bond to places where Customs officers are stationed, to be opened in the presence of such officers, who must collect and account for any duty payable on them. Parcels, the contents of which are not dutiable, must be forwarded at once to the Parcel Post Office nearest to destination. The necessary Customs entries will be passed free of cost to the addressees of parcels received.

Applications for money orders must be in writing, and must contain the information necessary to insure payment of the proper person. The Christian names at full length must be furnished if possible, not merely the initials. The usual designation of a corporation, company, society, firm, official title, etc., will suffice as remitter or payee. The name of the State, or Country, in addition to the town where payment is desired, must be stated, as towns of the same name exist in different parts of the world, such as Bristol, Croydon, Campbelltown, Gladstone, Ipswich, Maitland, Maryborough, Newcastle, Perth, Richmond, Queenstown, Wellington, etc. The address of the remitter must also be furnished in order that he may be communicated with if necessary. Forms of application may be obtained at any money order office.

No single order payable in the Commonwealth, New Zealand, Canada, Germany, India, or the United States of America may be issued for more than £20; to all other places the limit is £10 except that the maximum amount of a money order from New South Wales or Victoria to Italy may be £20. Two or more orders may be obtained when it is desired to remit larger amounts. No order may contain a fraction of a penny.

Postal Notes.

Postal Notes may be obtained at the Chief Money Order Office, Monday to Friday, 9.30 a.m. to 3.30 p.m.; Saturday, 9.30 a.m. to noon At the Stamps Sales Office, and General Post Office in each State, during office hours when the Money Order Office is closed. At most post offices in the Commonwealth, during the hours they are open for the sale of stamps.

They shall be payable at all postal note offices, during the hours the latter are open for the transaction of business.

The denominations of postal notes issued, and the commission or poundage charged thereon shall be as follow:—

Denomination	Commission or Poundage.	Denomination	Commission or Poundage.
1s.	4d.	4s. 6d.	1d.
1s. 6d.	4d.	5s.	1½d.
2s.	1d.	7s. 6d.	2½d.
2s. 6d.	1d.	10s.	3d.
3s.	1d.	10s. 6d.	3½d.
3s. 6d.	1d.	15s.	3d.
4s.	1d.	20s.	3d.

The value of the notes have been so arranged that any sum of shillings and sixpences up to £1 can be remitted by not more than two of these notes.

Broken amounts not exceeding 5d. (but no fractions of a penny) may be added by affixing unobliterated and unperforated postage stamps of the State of issue to the face of a note, when the value of the notes and stamps together will be paid.

The name of the person to whom it is desired payment shall be made may be inserted in the space provided for that purpose in which case the note must be receipted by such person, and if it be presented for payment by any other person he must also receipt the note. The name of a money order or postal note office at which it is desired payment shall be made may be inserted, when (except as mentioned below) the postal note shall be payable at that office only.

A postal note may be crossed (like a cheque), when it shall be paid only through a bank. A note so crossed may be paid at any money order or postal note office in the Commonwealth, notwithstanding that the name of an office other than that at which it is presented has been inserted. Notes so crossed must, besides being signed by the payee, be presented by a bank official and bear an impression of the bank's stamp.

If the spaces for name of payee and paying office be not filled up, or if the note be made payable to "Bearer," the value thereof may be paid at any money order or postal note office in the Commonwealth, on the person by whom it is presented duly receipting the same.

After a postal note has been paid, by whomsoever presented, the Postmaster-General shall not be liable for any further claim.

After the expiration of six months from the last day of the month of issue, a postal note shall be cashed only at the General Post Office of the State of issue and on payment of a commission equal to the amount of the original poundage, for each period of six months, or portion thereof, beyond the first six months from month of issue; the amount of such commission must be affixed in unobliterated and unperforated postage stamps of the State to the face of the note. A postal note presented for payment after six months from the month of issue shall not be paid until reference has been made to the Chief Money Order Office of the State.

If a postal note contain any alteration or erasure, or be cut, defaced, or mutilated, payment may be refused.

No stamp duty is charged on any postal note issued or paid within the Commonwealth.

Such telegrams, with full fee, must be enclosed in sealed envelopes. If the full amount payable for the transmission of a telegram be not enclosed the latter shall be forwarded to its destination, but the addressee shall be required to pay, before delivery, the amount short-paid, together with the cost of the necessary instructions to the delivering office to collect the amount of deficiency.

This business is done under the International Regulations.

NEW CALIFORNIA.—Between all stations in Queensland and all stations in New Caledonia—*Ordinary.* For each word, 9d. *Press.* For each word, 4d. Addresses and signatures counted.

Double the prescribed rates shall be charged on telegrams (Press telegrams excepted) tendered for transmission on Sunday, Christmas Day, and Good Friday; and on other days between 8 p.m. and 9 a.m., local time, for transmission to offices where business is transacted during those hours.

Telegrams tendered for transmission must be written in a legible manner, in plain language, and when practicable on the proper form, and the address must contain all information necessary to avoid delay and insure delivery. The signature of the sender need not be transmitted, or a telegram may have an abbreviated signature known to the receiver, but the correct signature of the sender must appear on the back of each telegram as a guarantee of its authenticity, and as subscribing to the conditions under which it is transmitted. In the text amounts or numbers must be written in words only.

The charges must be prepaid by means of postage stamps, which may be obtained at any Post or Telegraph or Telephone Office. The public must affix the stamps to the telegram forms, and the officer to whom the telegrams are handed for transmission must cancel the stamps in the presence of the person from whom such telegrams are received.

Books of "unstamped" telegram forms may be obtained, on giving timely notice, at any Telegraph or Telephone Office at a cost of 1s. per book of 100 forms.

Words which are habitually written as one word or coupled by hyphens shall be counted as one word, and those which are written without any hyphen, as two or three, as the case may be. Thus, O'Neil and O'Connell must be counted as one word; King of the Ring (name of racehorse) four words; Sir Joshua (name of racehorse) two words; City of Adelaide (name of ship) three words.

The prefix "St." must, however, be reckoned as part of a word, thus St. Kilda, St. James, St. Arnaud, shall be counted as one word each.

A multiple telegram may be addressed, either to several persons in the same locality or in different localities, but served by the same telegraph office, or to the same person at several addresses in the same locality, and shall be charged for as a single telegram with a further charge of half-rate for each copy after the first; the minimum charge for each copy shall be 6d. This regulation shall not apply to "Press" Telegrams.

Telegrams marked "Collect," addressed to places within the Commonwealth, may be accepted only when the sender is known to the officer in charge, and signs an undertaking on a printed form provided for the purpose, that in the event of the addressee refusing to pay the charges for the telegram, he or she will be responsible for the payment of the amount, and the cost of the telegram of advice of the non-payment by the addressee. The word "Collect" must appear in the preamble of the telegram, and be charged for.

The cost of a reply may be prepaid, and a reply-form shall then be delivered to the addressee, who shall be at liberty to send a telegram of the value prepaid from any telegraph office within the State. A reply-form need not necessarily be used for a reply, but may be used to prepay or partly prepay any single telegram for transmission to any place within the Commonwealth, within three months from the date of issue.

Telegrams posted at a post office (which is not a telegraph or telephone office), or in a posting receptacle, shall be forwarded by first mail to the nearest telegraph or telephone office, and transmitted thence by telegraph or telephone to destination, provided the form on which the telegram is written bears unobliterated postage stamps, or is accompanied by cash, sufficient to defray the cost of such transmission, and that it be enclosed in an envelope (on which postage need not be paid) indorsed "Telegram only," addressed to the officer in charge at the nearest telegraph or telephone office. If the full amount payable for the transmission of the telegram be not enclosed, the latter shall be forwarded to its destination, but the addressee shall be required to pay, before delivery, the amount short-paid, together with the cost of the necessary instructions to the delivering office to collect the amount of deficiency.

Urgent telegrams for transmission to places within the Commonwealth, shall be accepted from the public on payment of double the ordinary fee. Such telegrams will be transmitted and delivered in preference to any other telegram. "Urgent" forms and envelopes must be used for "Urgent" telegrams.

When the sender of an urgent telegram prepays a reply, the officer accepting the telegram must ascertain if the reply is also to be treated as urgent or as an ordinary telegram, and the fact, as the case may be, must be stated in the preamble of the telegram, thus:—"Reply paid, urgent rate," or "Reply paid, ordinary rate." These words must be paid for by the sender of the telegram.

Telegrams shall be delivered, free of charge, within a radius of one mile, and on payment of 3d. if beyond one mile and within a radius of $1\frac{1}{2}$ miles from the office of destination provided that messengers are attached to that office. If natural obstacles or other difficulties intervene, the Department shall not undertake delivery. Beyond the $1\frac{1}{2}$ -mile radius delivery expenses shall be charged. For telegrams to be delivered on shipboard a charge for boat hire, if necessary, may be made.

No receipts from the addressees need be taken upon the delivery of telegrams originating in and delivered within the Commonwealth, should it be necessary to obtain evidence of the delivery of a telegram, a receipt therefor, by telegram, may be ordered at the time such telegram is lodged for transmission, and shall be telegraphed back to the sender upon payment of ordinary telegraph charges, or, if desired, sent by post card on payment of 1d.

Senders of telegrams must invariably give every information they can to the officers of the Department that will facilitate delivery; if the sender omit to do so it is at his own risk. When it is found that the place to which a telegram is to be delivered is beyond the radius of $1\frac{1}{2}$ miles from the office, and no portage has been guaranteed or paid, the telegram may be posted from the office of receipt.

Where no messengers are employed telegrams remain at the office until called for. Arrangements have been made in many cases for special delivery, at fixed rates, of telegrams for places beyond the limits of free delivery.

Notices of removal and instructions in writing, respecting the delivery of telegrams at hours when the addressee's place of business is closed shall be registered free of charge. If no such instructions have been registered, and any additional service is performed in delivering a telegram at a second address in the same town, an extra charge of 6d. shall be made.

Ordinary telegrams take precedence of press telegrams between the hours of 9 a.m. and 6.30 p.m., and all telegrams received at any one time addressed to the proprietor, publisher, or agent of a newspaper for transmission at press rates between the hours named may be restricted to 500 words.

Subscribers to telephone exchanges may transmit by telephone to any telegraph office which may be connected with a telephone exchange messages intended to be further transmitted from the telegraph office to the respective destinations of such messages as telegrams; provided they pay the usual cost of such telegrams in addition to the rates for transmission through the telephone.

Any person employed in a telegraph office may refuse to receive or transmit a telegram containing blasphemous, indecent, obscene, offensive, or scandalous matter in its contents, address, or signature.

Arrangements may be made to keep any official office open for the transmission of telegrams after the ordinary business hours, upon notice being given to the officer in charge, at least one hour before the ordinary time of closing, and upon payment of a deposit of 2s. 6d. for the first hour or portion thereof and 1s. 6d. for every subsequent hour, or portion thereof, during which it is desired the office shall be kept open. All telegrams transmitted must be paid for at the usual rates.

REDIRECTION.—A telegram may, on the written request of the addressee or his agent, be redirected and retransmitted from one office to another within the Commonwealth; such telegrams shall, on retransmission, be charged the full rate, which must be paid before delivery.

REPETITION OF TELEGRAMS.—In order to provide against mistakes in the transmission and delivery of telegrams, any telegram may be repeated by being retransmitted from the office of delivery to the sender on payment by the latter, at the time of lodgment, of 50 per cent. in addition to the ordinary rate. In such telegrams the word "repeat" must appear in the preamble of the telegrams and be charged for.

RECTIFICATION OF TELEGRAMS.—The receiver of a telegram may have the whole or part of it repeated on payment of the cost of the telegram demanding the repetition and of the reply to the same. The sender may also have the whole or any portion of his message repeated on payment of the cost of the telegram he forwards and of the reply.

The money paid for the repetition shall be refunded should such repetition show that the error was made in the original telegram, but shall be retained should no error have been made; provided, however, that when some words have been correctly, and some

incorrectly, reproduced in the first telegram, the charge for words in the request for repetition, and in the reply relating exclusively to words correctly transmitted originally, shall not be refunded. No refund shall be made for words written in a doubtful manner, nor shall any claim be entertained for refund of cost of consequential telegram, that is, private telegrams which the addressee or sender causes to be sent in connection with any supposed error in a telegram.
